

CASE STUDY

SCHOOL PLAYGROUND & SURROUNDINGS

NORTH LONDON

Southgate is an attractive area of North London with tree-lined streets, a wealth of shops, pubs and restaurants, as well as a unique art deco Grade 2 listed tube station!

While being within an easy commuting distance of Central London, Southgate has spacious parks and other excellent facilities for residents bringing up a young family.

The school playground project we undertook needed to be completed over the half term period and the order was only confirmed at the last minute. Given also that the weather was against us, RSP had a bit of a mountain to climb!

We have extensive experience in school landscaping, including the surfacing and marking-out of playground areas to the highest quality standards.

Our specialist teams involved have worked at many schools and educational establishments in London and the Home Counties and are experts in designing play and sports areas, ensuring that they are safe, meet all regulatory standards, and are able to offer the very best of experiences for the schoolchildren or students that use them.

The work covered over three playground areas where the surface had become very brittle, but care was needed to ensure that the surfacing did not extend beyond existing perimeters. This required a high degree of accurate planning. We also installed a new footpath and entry pathway, as well as constructing a new drainage system.

When the children returned from the half-term break, the project had been completed to the highest quality standards, providing the school with excellent new outdoor facilities to enjoy.
